“Make your appliances smart”

AIT Smart Automation works to grant smartness to every appliance at your place, by not only offering you an option to monitor them via your smartphone, and voice control but also schedule them according to your routine

Product Summary

AIT Smart Automation

AIT Service Corporation stand for advance information technology, it was founded in 2012 as IT sales and service providing company. We try to upgrade our products and ensure to widen our segments regularly. AIT then entered in SMART home Automation in 2018 with pro-designed and trusted manufactured units. It is organised, styled and produced entirely in India.

We create all smart home devices on our own and we take care of even the smallest detail of the projects. In just a few years, AIT is well known for providing best quality products and for our after sales services. We ensure to prioritise and take care of the needs of the client and also give them smart and secure home solutions in affordable prices. AIT Service has purpose in proactively protecting your home and keeping you connected to it, no matter where you are.

A home automation system will monitor and/or control home attributes such as lighting, climate, entertainment systems, and appliances. It may also include home security such as access control and alarm systems. A home automation system typically connects controlled devices to a central smart home.

The control of the system is either wall-mounted terminals, tablet or desktop computers, or even a mobile phone application. Home automation has high potential for sharing data between family members or trusted individuals for personal security and could lead to energy saving measures with a positive environmental impact in the future.

Enjoy the best design and functions combined together

Product Introduction

Explore A Wide Range of Smart Products

AIT Smart Automation Mobile Application

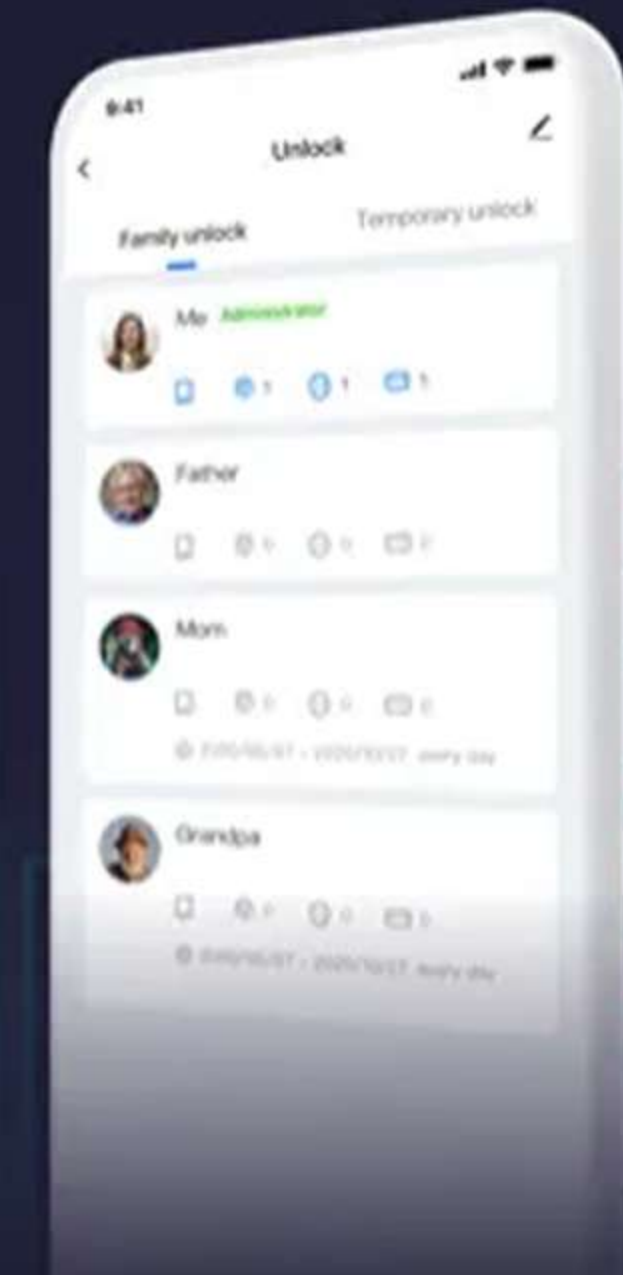

One App, Multiple Controls

Smart Control

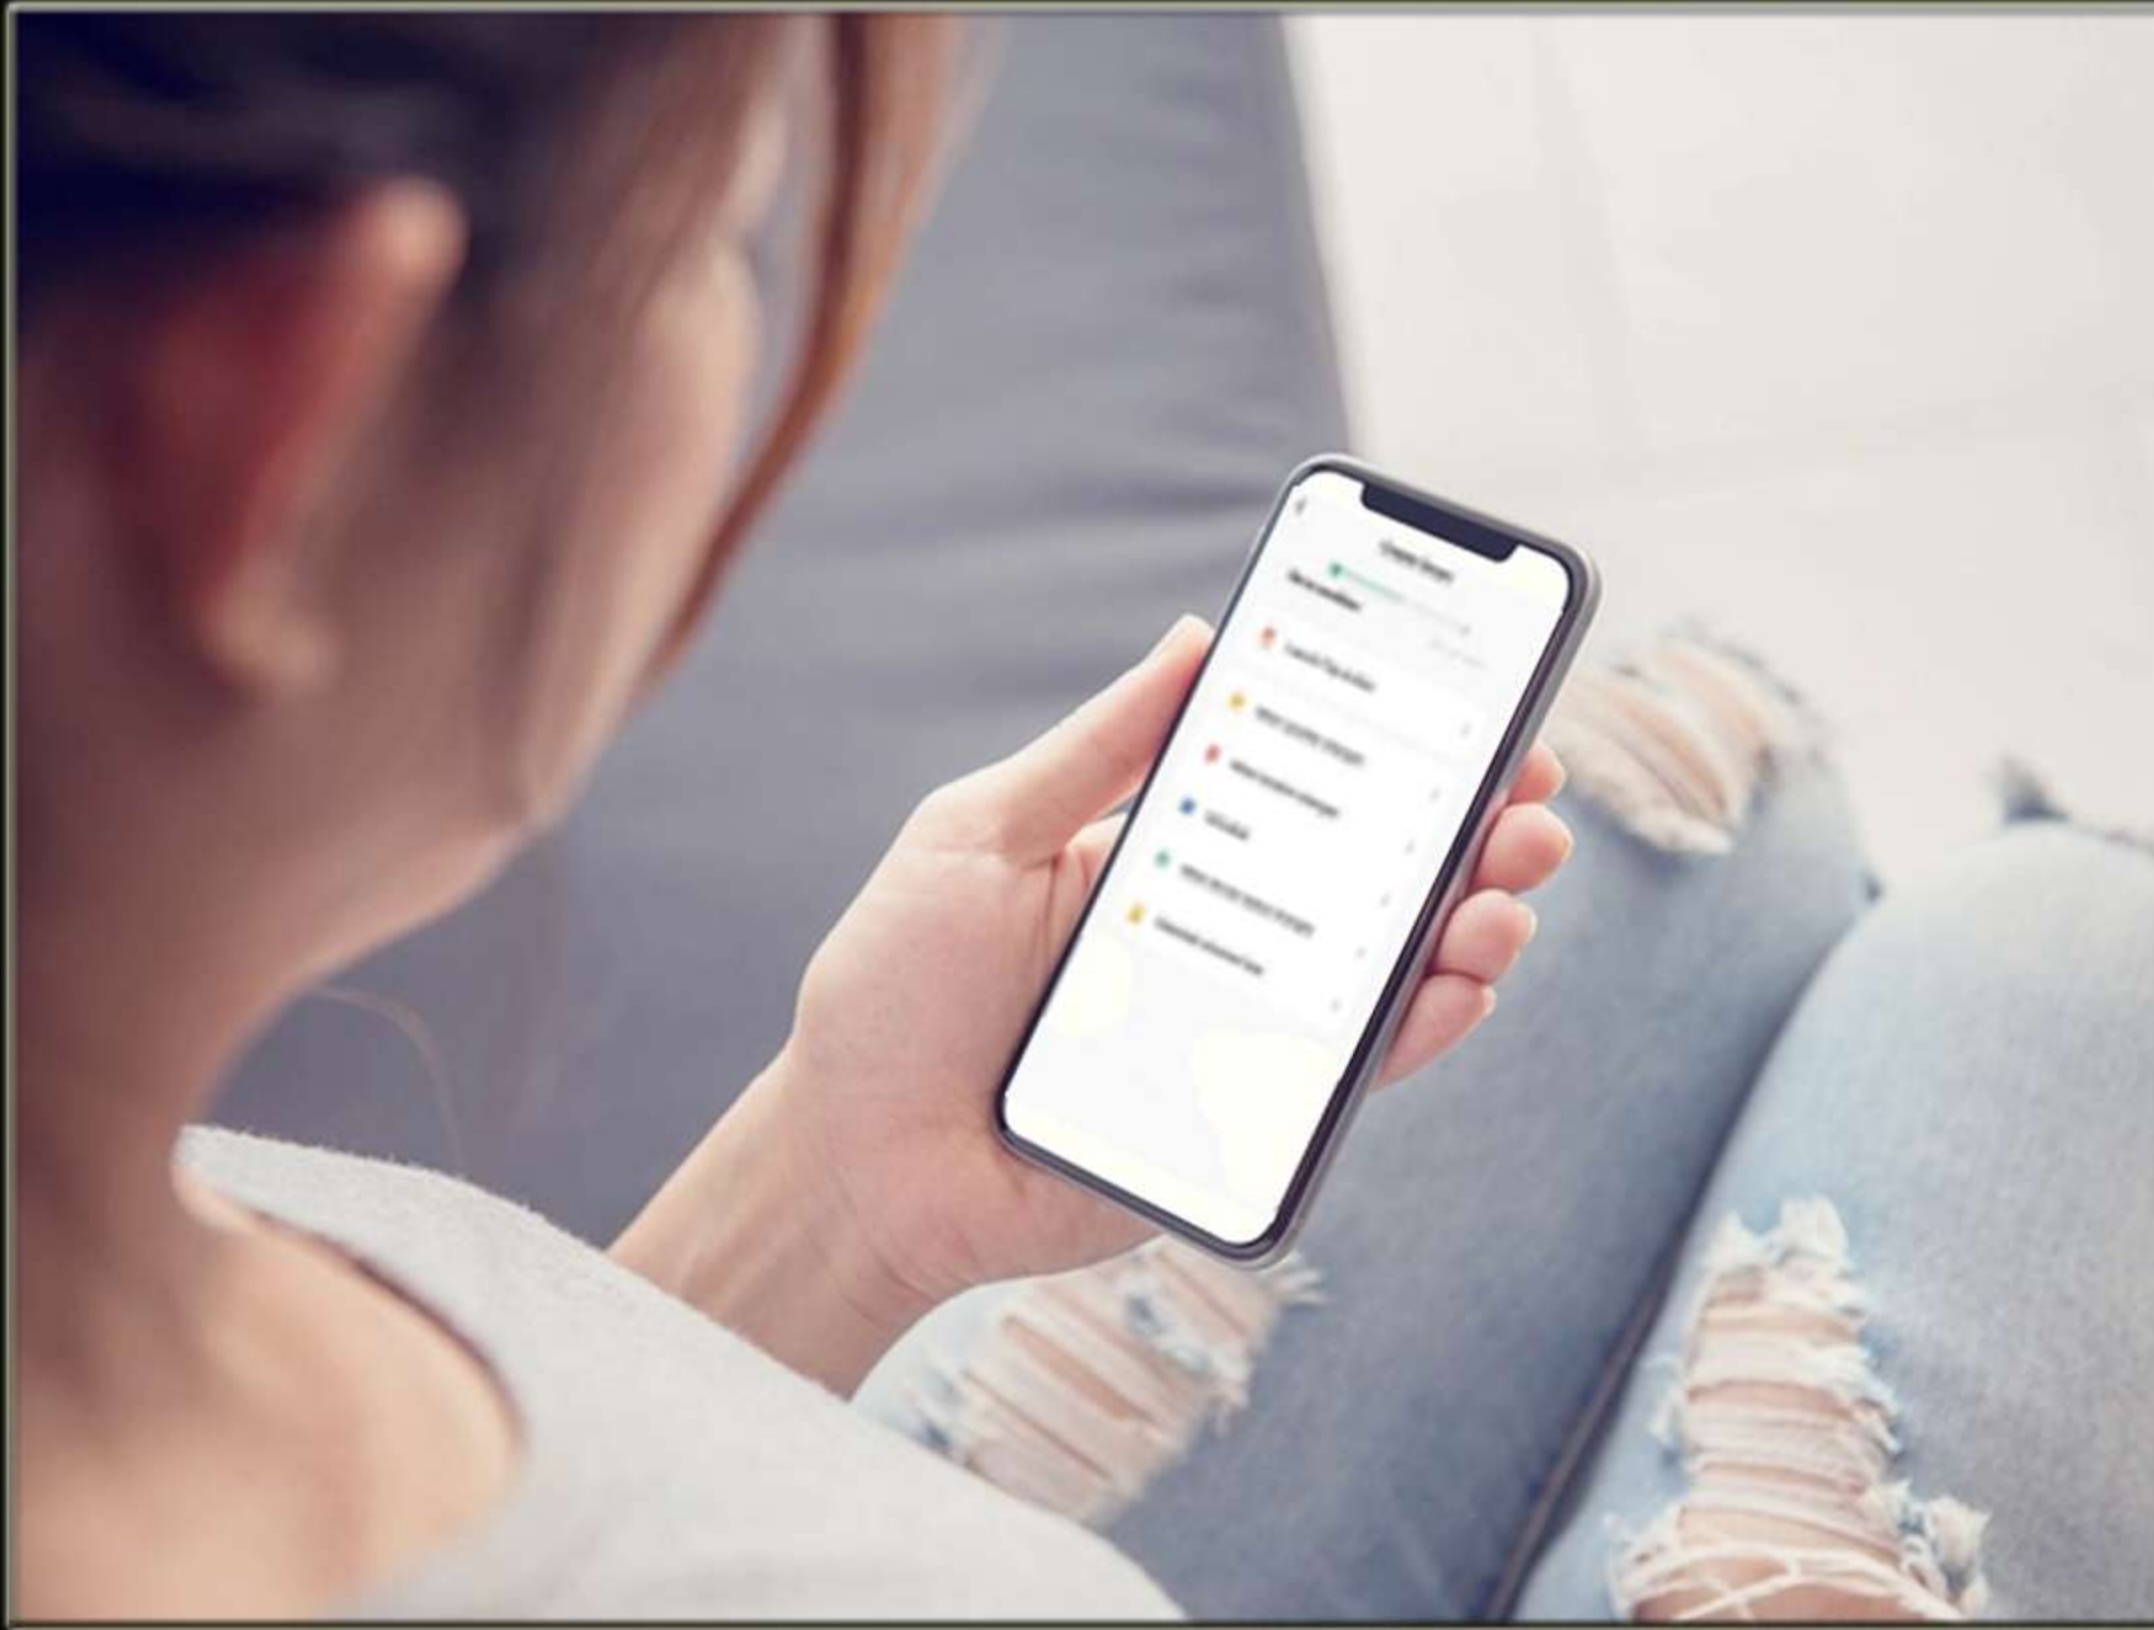

Create your own intelligent scenarios

Enjoy the smart life together with your family

Customize your Home Autoation

Unneed the need of turning on the switch at your place at 6 pm daily when you get home.

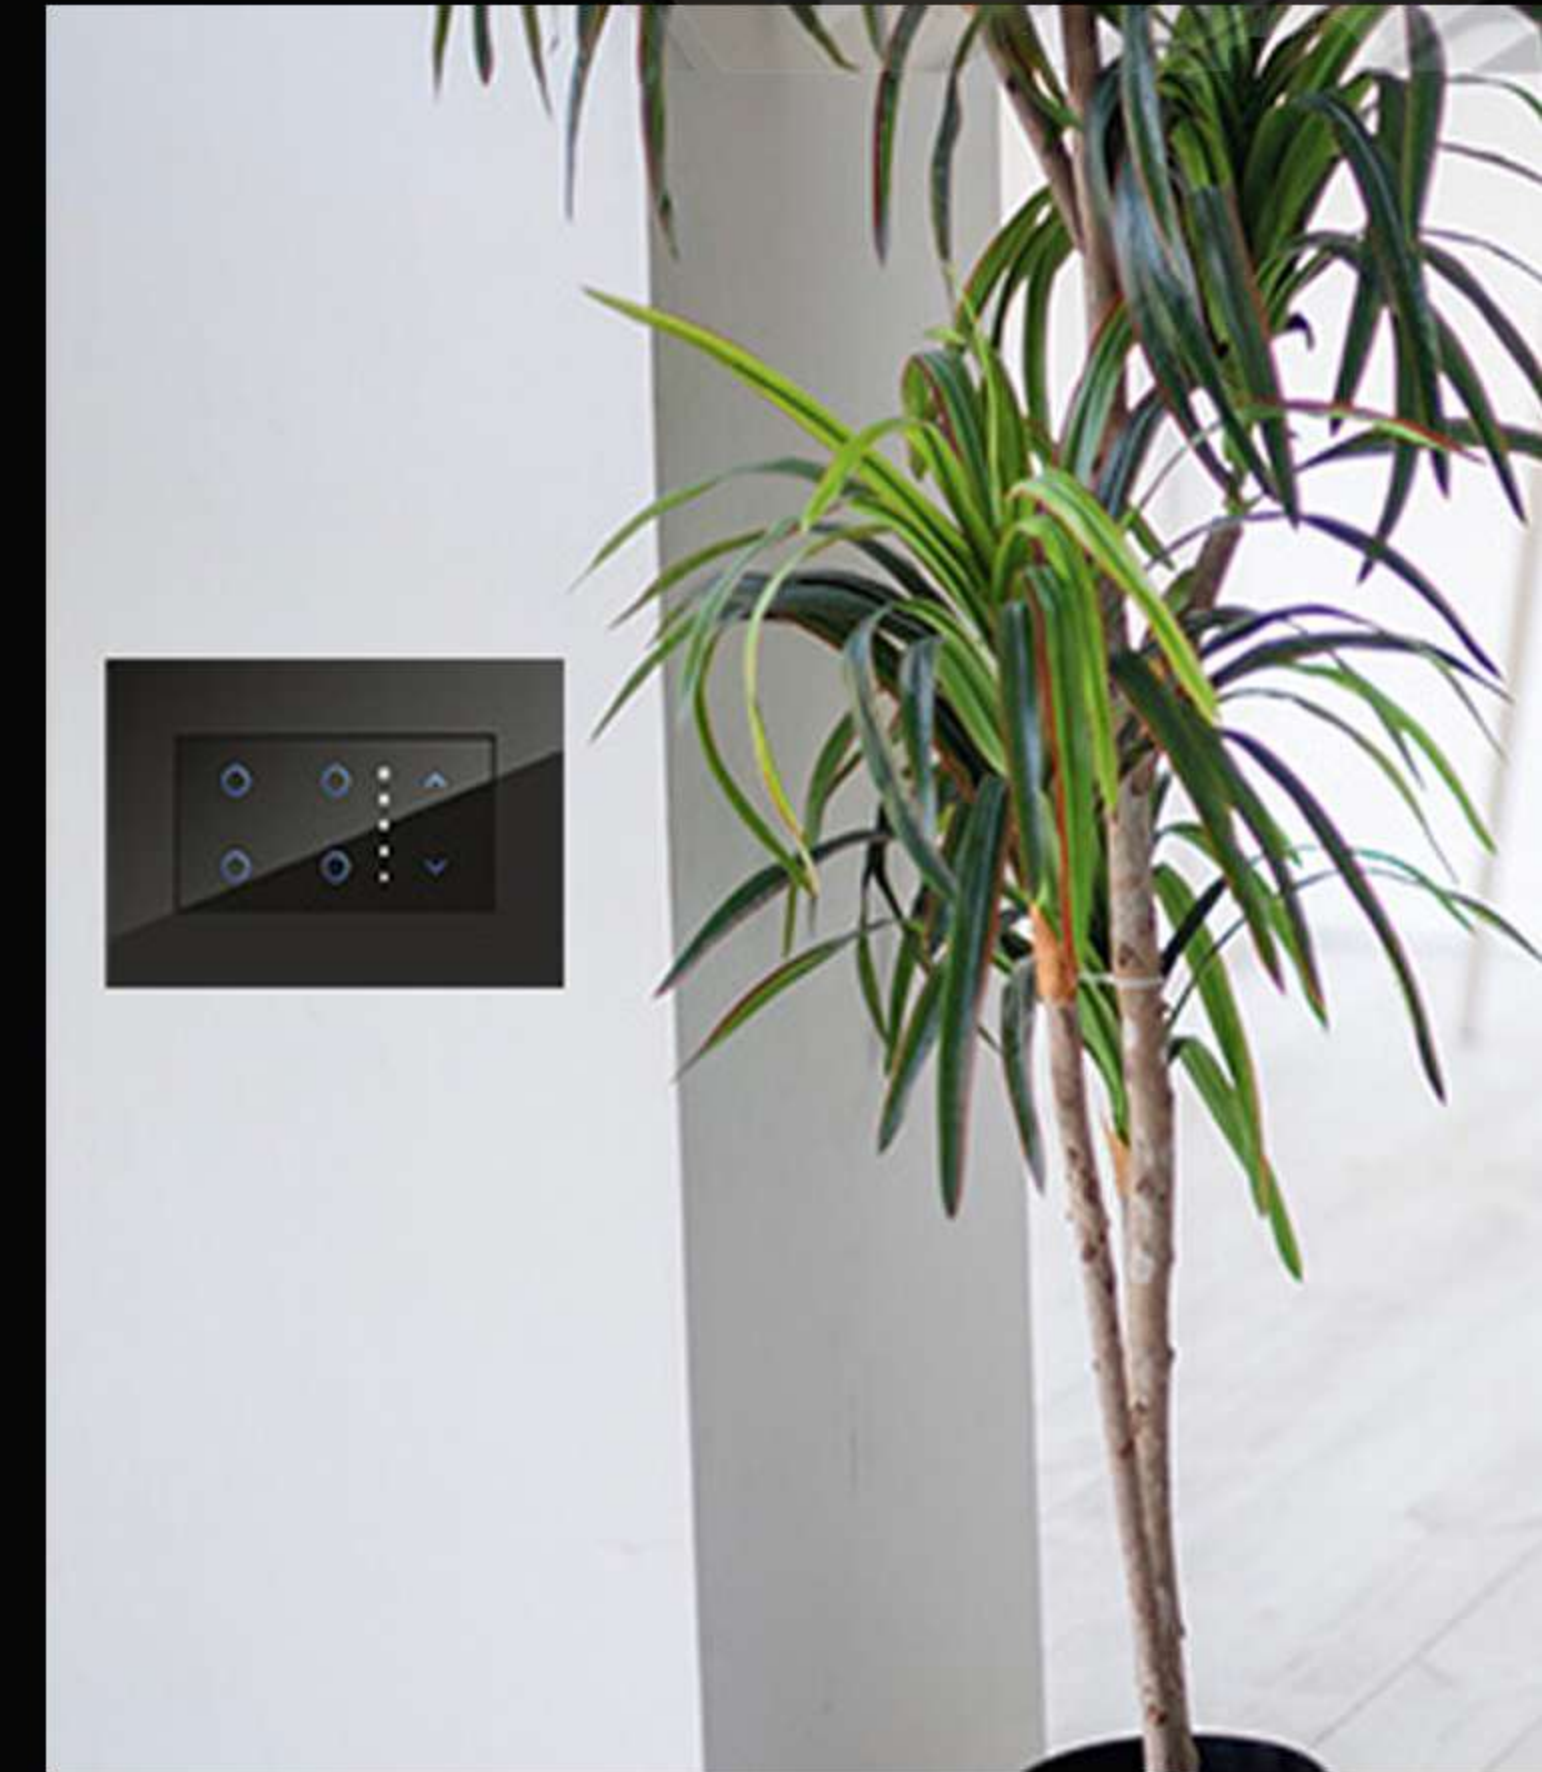

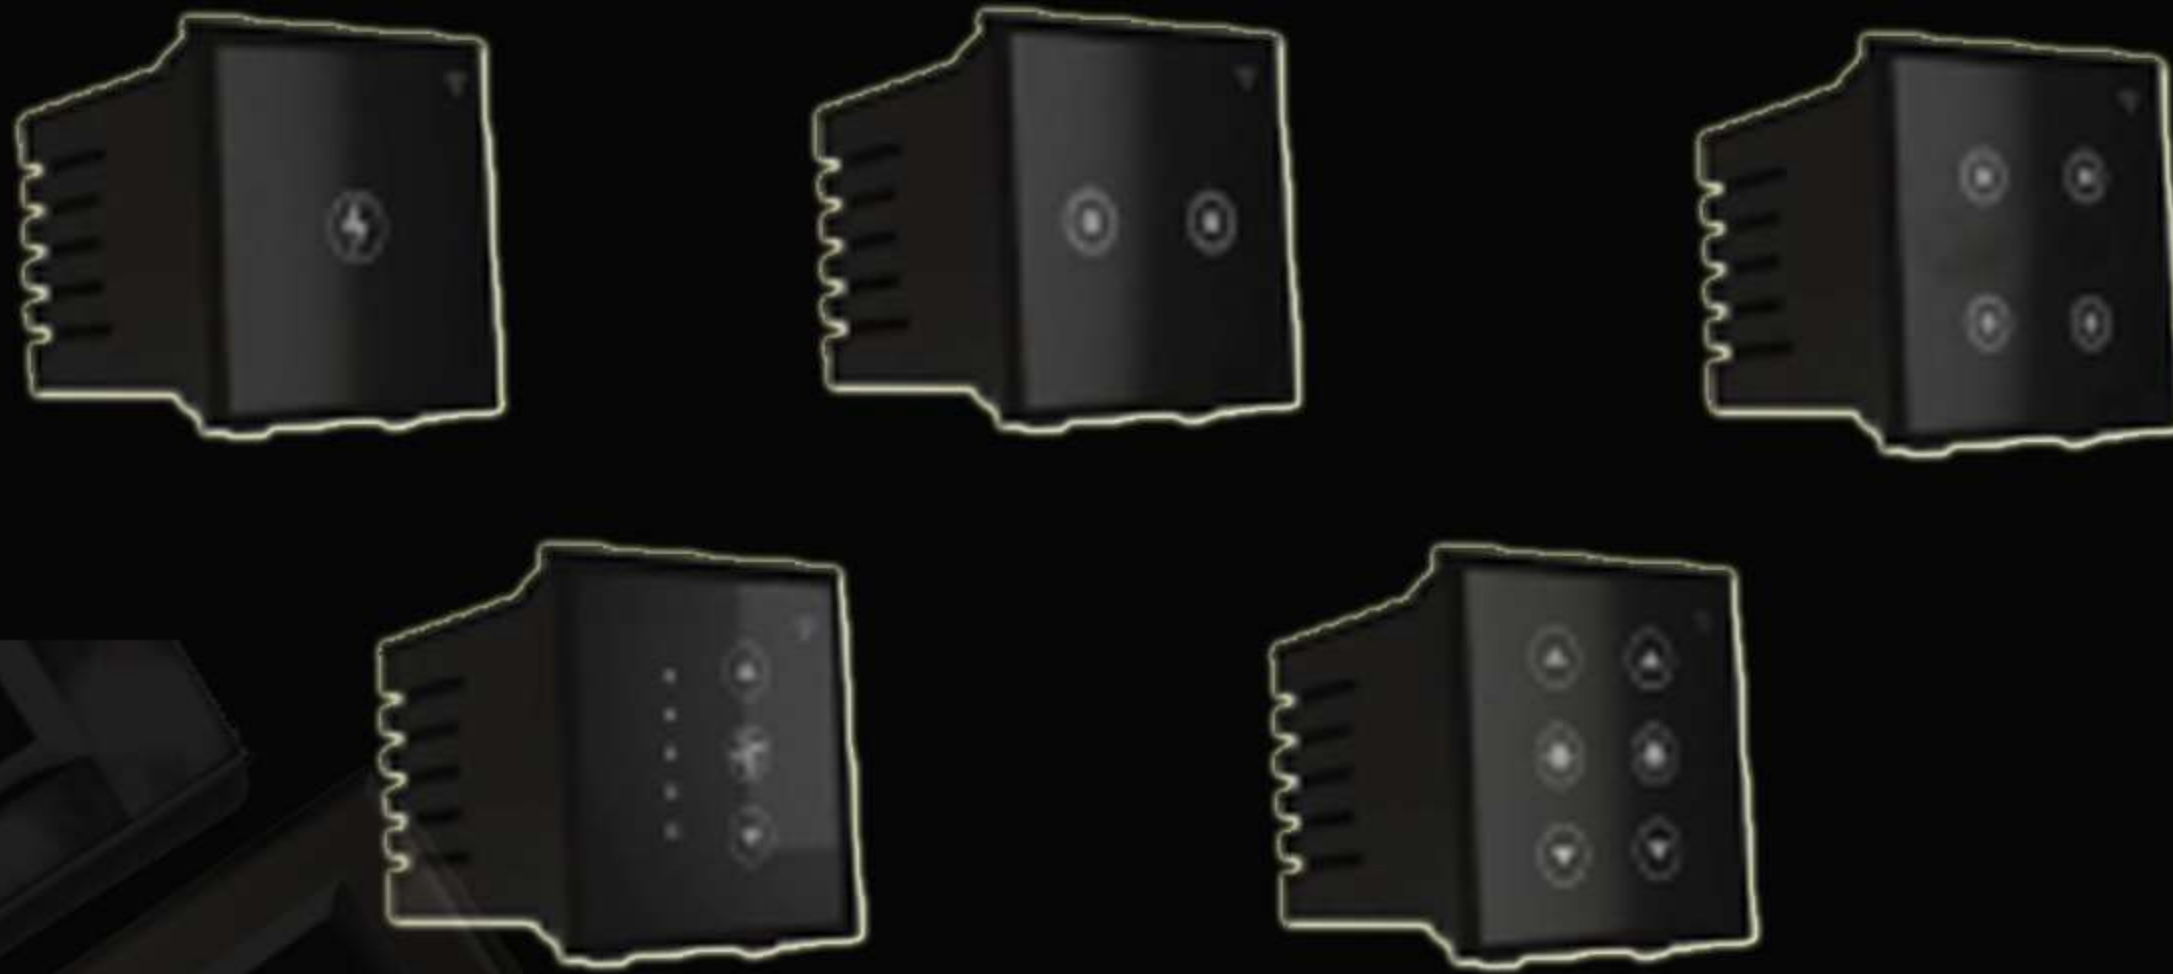

Schedule your AIT's Smart switch for your smartphone according to your routine.

All the products of AIT are linked with mobile application. This integration allows every user to monitor the reports sent by AIT's Smart Devices and take appropriate action via his or her smartphone, Mobile application is the epicenter of control for all our products. So, any time you wish to monitor or control any of your devices, all you need to do is open your Mobile Application and its one tap away.

Glass Panel Touch Switches

Glass panel touch switches can be installed at any wall of your place for controlling every appliance in its surrounding. Based on smart touch technology, a smooth tap on it would lead to turn on/off of the appliance associated with it. Equipped with backlight, constant color output on glass panel touch switches would indicate on/off condition

_Wifi Operated _App Controlled _Smart Touch _Schedule ON/OFF _Countdown

_Voice Compatible _Triger By Location _Triger By Weather _Triger By Situation

This camera is high in resolution with HD view. This camera also works in night vision mode.

- 2 Way Calling
- Motion Detection
- Bell Ring
- HD Resolution

Smart Door Lock

6 Way to unlock

Adapt when employed Sophisticated in look

If we say “No one would be able to enter without your permission, if you are user of AIT Smart Door Lock” that would be too obvious. But if we say “AIT Smart Door Lock would be able to have a complete idea about your door’s surrounding and even let you control the entries and exits from your place via your smartphone” it’d be surprising, or truly shocking.

They say “the first impression is the last impression.” Practically thinking about this, your door is what people see even before, they see you. So why compromise on its design ? AIT’s Smart Door Lock has been designed keeping this philosophy in mind.

You can operate AIT’s Smart Door Lock using your fingerprint, RFid Card, Wifi, Key, Pin, OTP, as well as smartphone. Because it has multiple ways to unlock, it minimize the probability of demolishing your door in case you forget one way to open it. AIT’s Smart Door Lock is designed for easing out the monitoring and controlling of the most important junction at your place i.e. Door.

Smart Zigbee Sensors

Operable from anywhere, once connected with a device, AIT's WiFi and Zigbee sensors will report to you any nuisances in the environment of the nearby device. Using this information you can respond accordingly to the situations.

AIT's Zigbee sensors are motion-sensitive and can also detect a water leak. They are also weather sensitive as well as light sensitive. In an integrated fashion AIT's Wi-Fi and Zigbee sensors can instantly respond about AC, door, electrical appliances as well as taps at your place and let you monitor them 24X7 via your smartphone.

Zigbee Motion Sensor

Zigbee Gateway

Zigbee Temperature Sensor

Zigbee Door / Window Sensor

Zigbee Gas Sensor

Zigbee Smoke Sensor

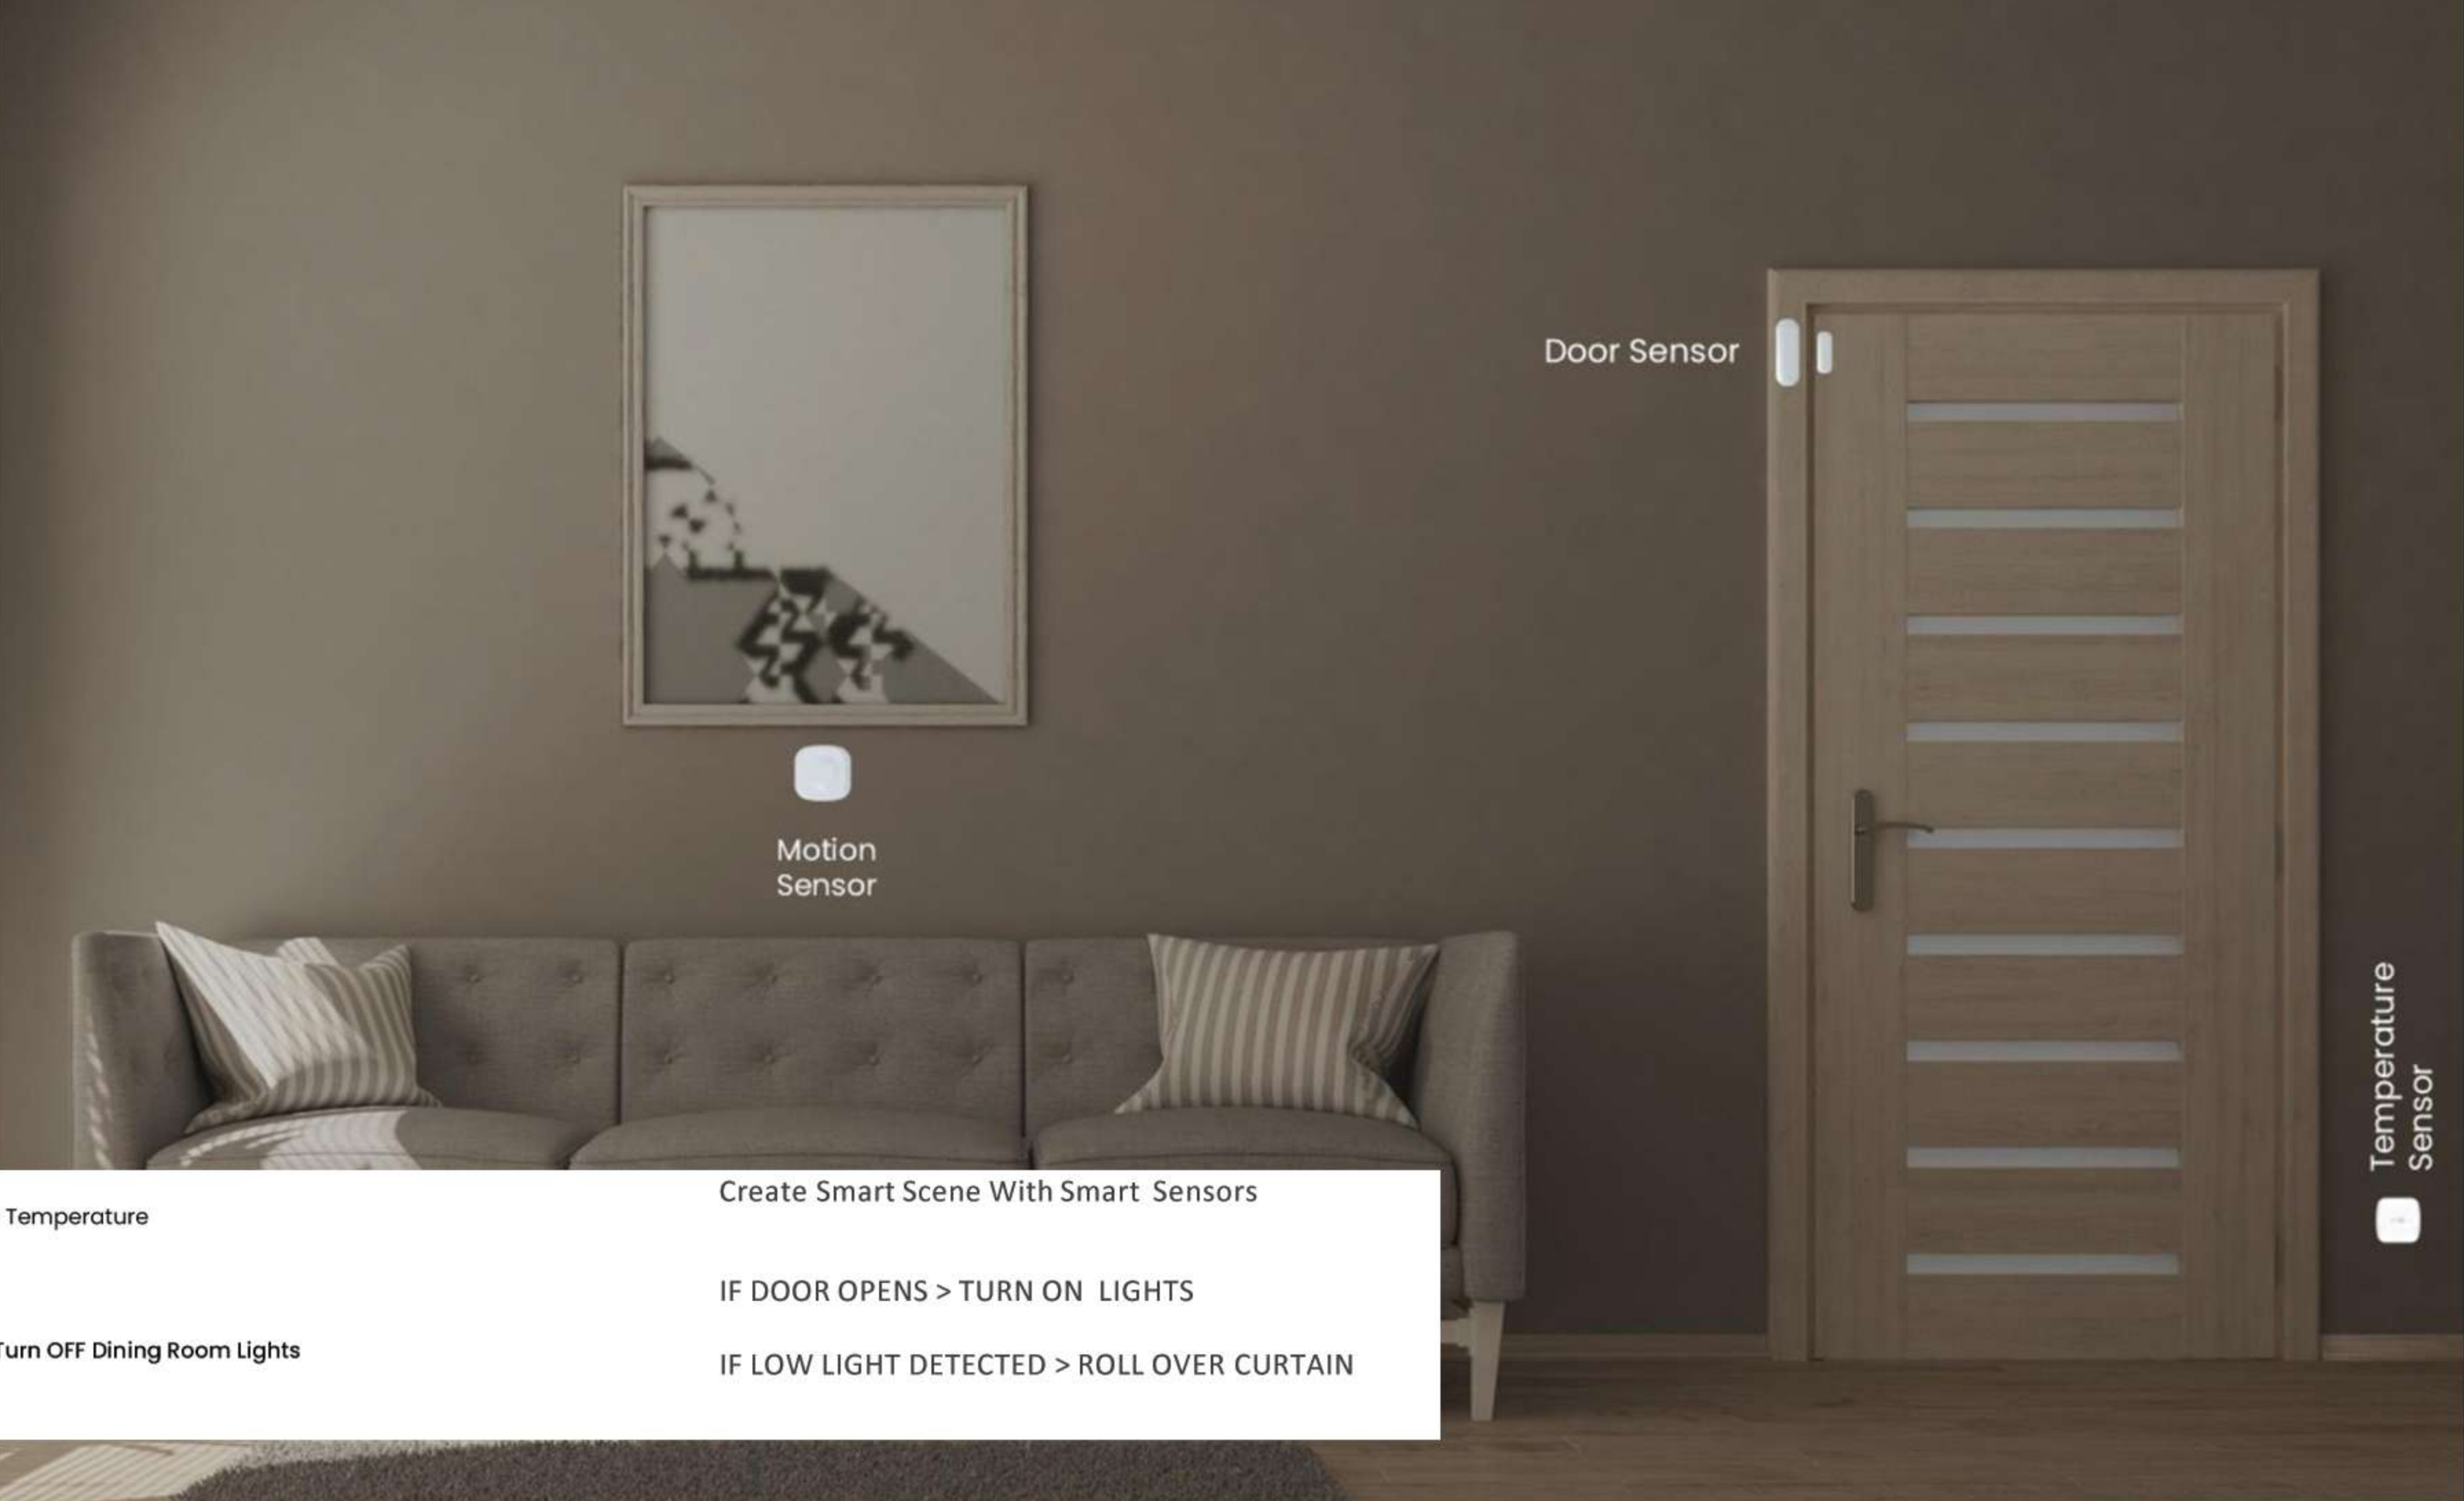

Wi-Fi Smart Gas Valve

Sensors That Keeps You Connected

AIT's Zigbee sensor consume zero electricity, yet establishing wireless communication with all your devices.

Create Smart Scene With Smart Sensors

IF DOOR OPENS > TURN ON LIGHTS

IF LOW LIGHT DETECTED > ROLL OVER CURTAIN
