

SMART
AUTOMATION

Make Your Villas or Bungalows Smart

offers Smart Automations Solutions for your villas or bungalows. The solution addresses Safety, Security, Comfort, Convenience, Energy Efficiency and Entertainment aspects enabling them to be smart bungalows or smart villas. We offer intelligent solutions that control and monitor both the Villa's exterior and interior sensors, devices and assets. The villa's exterior can be completely monitored and controlled by our Building Management System and for interiors we offer our unique Home Automation System and Smart Touch Switches. Even existing bungalows or independent houses or those under construction can deploy all or parts of our solutions as per the requirements of the owners.
